

D30 Regulator - 30 bars Neutral gas regulator

Non-contractual photo.

USE

Useful for pressurising refrigeration and air-conditioning systems with nitrogen.

Discharges and regulates the pressure of the bottles in order to ensure a constant working pressure.

Recommended in particular for VRV-type systems loaded with all commonly used refrigerants, with the exception of R-410A (please use D60).

PROPERTIES

- Type of gas: neutral (Nitrogen or the Arcal variety of Argon)
- Solid precision pressure gauges, protected by a rubber coating
- Gauge upstream of the regulator with a maximum service pressure of 200 bars (graduated from 0-300)
- Gauge downstream of the regulator with a maximum service pressure of 30 bars (graduated from 0-60)
- Normal flow: 100 Nm³/h
- Type C input connector
- Output connector: M16 nut x 1.5D
Tiered barbed fitting: diameter 6/10
- Unloseable trigger screw
- Fitted with a safety valve
- **Weight=1.5 kg**
